Summary

Data Analyst with prior experience as a Software Developer, skilled in Excel, Power BI, SQL, and Python. Experienced in data cleaning, data analysis, dashboard development, and data visualization to derive actionable insights. Strong problem-solving ability with a focus on data-driven decision-making.

Skills

Data Analysis: Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA)

Tools: Microsoft Excel (Pivot Tables, VLOOKUP), Power BI

Programming: Python, SQL (MySQL)

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Projects

User Engagement Analytics in Social Media using Python

- Built a user engagement analysis pipeline using Python and Pandas
- Performed correlation analysis, groupby aggregation, and segmentation to study user behavior
- Developed a behavior-based classification approach to identify high-intent users
- Generated insights using data visualization (Seaborn, Matplotlib)

Data-Driven Analysis of Social Media Users | View Project

- Analyzed social media user data to identify engagement trends and behavior patterns
- Cleaned and structured datasets in Excel for accurate analysis
- Developed interactive dashboards using Power BI for visualization
- Provided insights to improve content strategy and user engagement

Experience

Software Developer

Amrita E-Learning Research Lab

Jun 2011 – Jul 2015

Kollam, Kerala

- Developed and maintained applications using Adobe Flex and SQL
- Optimized database queries to improve performance and efficiency
- Debugged and enhanced application reliability
- Collaborated with teams to deliver scalable solutions

Education

Sona College of Technology

Master of Computer Applications (MCA)

Salem, India

Anna University

- **CGPA:** 7.99 / 10

Certifications

AI-Driven Data Analytics (In Progress)

Entri Elevate

Expected April 2026

- Learning data analysis and visualization using Excel and Power BI
- Gaining hands-on experience in SQL and Python for data processing
- Applying concepts through real-world datasets and projects
